

# Monitor Matrix

## Legend

AM	Asset Control capabilities that allow monitors to work with Compaq's Intelligent Manageability tools
C	Color monitors
E Star	Energy Star compliant product. Meets industry standard guidelines for power consumption
Equatorial	For Equatorial applications
FS	Full Square monitors
GSA	Product intended only for General Services Administration purchase
Low Emission	Refers to front-of-screen energy emission levels. Meets industry standard specifications for reduced emissions
MPRI/MPR II	Refers to front-of-screen energy emission levels as specified by European Standards Associations. MPR-II is a later version of MPR
TCO	A European standard similar to MPRI/MPRII, except stricter. Lower levels of emissions or radiation allowed than in MPRI/MPRII
N/A	For North American applications and most South American
N/H	For Northern Hemisphere applications, typically Canada, Asia Pacific, and European markets
P	Performance Line of Monitors
POL	Polished glass
PRE	Monitors optimized for Presario computers
QV	Monitors optimized for Compaq QVision Graphics Controllers
S/H	For Southern Hemisphere applications (Australia, New Zealand, South Africa). South America normally uses the North American kit
V	Value line of monitors
